(54) SECURITY INFORMATION SUPPORT SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a security information support system which can perform the property application information service and the analysis of investments in a wide range of general investors.

SOLUTION: An information controller 10 installed at each business base calculates and stores the total property amount and the total market price amount for every investor and date from the latest commodity price information and the property information. The controller 10 also stores the transaction information as the transaction history information for every investor and date. When the necessary information are requested, a terminal device 13 displays transitions of the investment interest, the property interest and the property application state in graphs based on the necessary information.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
